An article on “smuggling”

Prepared by: Muhammad Nouman

Semester: BBA 6th

Date: 11-11-10

Abstract:-

Smuggling is actually a big crime which kills the economy of any countries, Pakistan is one of the most effected country of smuggling. it is government responsibility that they try to developed few steps which controls this disastrous acvtivites.it ruins different countries of the world. in this article I try to collect relevant data about smuggling in Pakistan.

Key words:-

Smuggling, relevant, ruins, disastrous, activities, crime, economy

Description:-

Since the creation of Pakistan, smuggling is ruining our economy. Different governments took major steps but they could not stop smuggling day after day, year after year smuggling becomes healthier and stronger in Pakistan. The main cause behind the failure in the elimination of smuggling was that government agencies were working without any co-ordination.

Our country also facing big challenges in smuggling. Our borders is long and deserted that's why its create friendly atmosphere for smuggling and to carry out smuggling items with comfort and ease. Pakistan should strengthen all anti-smuggling agencies of all routes including the land route, seaports, airports and all entry points. The country should man international borders and non-traditional routes and keep vigilance on the illegal entry of imported items.

The government of Pakistan should install scanning machines at all seaports, airports, check-posts and bridges. Besides the smuggling through the border areas, smuggling also continues through launches, airports and seaports.

According to a rough estimate, goods ranging from Rs 60 billion to Rs 100 billion are smuggled into Pakistan from India. We should avoid smuggling items and try to purchase all rights reserved products which is available in common market of Pakistan. Smuggling is like a virus for any economic developing country that kills all his major branches. So we should help and build our economy strength for the betterment of our future.

If we successfully eliminated smuggling which is very tough in our country after that all matters and problems solved easily.

References:-

I collected few data from internet (encyclopedia.com)and an organization(Adam shipping).

Conclusion:-

Last smuggling is a black sheep and we must stop this activity for the betterment of our economy and our future. it affected world's established economies and destroy their economies so we must unite as one try to finish this major problem
